# SOHAM T. JANI

sohamjani8@gmail.com | github.com/sohamtjani | linkedin.com/in/meetsoham

## EDUCATION

**University of California, San Diego** — **La Jolla, CA**
*B.S. in Data Science* — *Expected June 2030*
Relevant Coursework: AP Statistics, AP Calculus AB, AP Physics, Honors Computer Integrated Manufacturing, Honors Digital Electronics

## EXPERIENCE

**Soverin** — **San Francisco Bay Area, CA**
*Founding Engineer* — *July 2026 - Present*
- Solely building Soverin's SDK product with South Park Commons guidance: a game-intelligence pipeline that parses repositories, retrieves RAG context from 80+ reference games, and generates designs, mechanics simulations, and code patches.
- Pitched Michael Fertik (Verdict) and am developing Terra and Skirmish with a nine-layer LLM-driven NPC architecture and React + TypeScript frontend.

**YRI Science** — **San Francisco, CA**
*Intern Coordinator* — *April 2026 - Present*
- Built a sales system from scratch, despite no prior sales experience, that generated 30+ qualified leads valued at $36K+ and client calls in the first month.

**Excalibur** — **San Francisco Bay Area, CA**
*Founder* — *December 2025 - Present*
- Built and scaled an educational mentorship business from zero: sourced and converted 15+ clients, hired independently, and generated multi-five-figure revenue while redefining on-demand, in-home academic support.
- Pivoted to SMB growth infrastructure, secured local partnerships, and doubled new-customer signups in less than one month; clients signed month-to-month.

**Aspiring Scholars Directed Research Program** — **Fremont, CA**
*Head Researcher* — *December 2024 - Present*
- Benchmarked GPT-4.8, DeepSeek v3, and Gemini 3 across 50 prompt-engineering trials using NDCG, BLEU, and expert assertions.
- Authored and submitted an arXiv preprint on the evaluation results.

**Cerbrec Inc.** — **Virginia, USA**
*AI / Technical Intern* — *December 2024 - March 2025*
- Led deployment and documentation of 20+ composite functions powering GraphBook's core platform, improving system reliability for a growing user base.
- Advanced development of 10+ PyTorch-based ML modules, enabling new analytics features across the GraphBook core product.

## PROJECTS

**SVS**
*Program Builder | 1:1 Venture-Building* — *December 2025 - Present*
- Building a founder-led, 1:1 venture-building system for high-school students to identify real problems, test with users, and build first versions toward traction.

**VoiceX - Inductive**
*Full Stack Developer | Python, APIs* — *July 2026*
- Worked 1:1 with Inductive (formerly NuclearCore) CEO Rahul Agarwal to build a custom daily-use Python content-research workflow with SearXNG and WordPress API integrations.

**GlobalSVF** — **Charlotte, NC**
*Capital Consultant | Nonprofit Finance* — *February 2026 - May 2026*
- Selected to a 12% acceptance-rate program; helped deliver four-month nonprofit consulting engagements that generated $30K+ in the Charlotte area.

**RENOVA - Xtrace Hackathon**
*Stanford, NVIDIA, GM* — *2026*
- Won 2nd Place ($1,500) for RENOVA, an all-in-one confidence layer for home renovators.

## TECHNICAL SKILLS

**Languages & Databases:** Python, TypeScript, JavaScript, Dart, SQL, HTML, PostgreSQL
**Frameworks & AI/ML:** React, Node.js, Flutter, Supabase, PyTorch, LangChain, RAG, multi-model evaluation, prompt optimization
